ENTRY-LEVEL TECHNOLOGY

MICHAEL DOCK-WALSHE

Practical mindset. Ready to learn.

IT / SOFTWARE / AUTOMATION

PROFILE

I am seeking an entry-level role in IT, software or automation. Alongside my work at KFC, I am developing a personal website with AI support. I want to bring my practical work experience to a technology team, contribute to day-to-day tasks and build my skills through hands-on learning.

WHAT I BRING

Practical project experience

Developing a personal website with AI support, from its purpose and page structure to its presentation. The case study records the changes and checks behind the result.

Clear requirements and review

Set the intended audience and priorities, refine the wording and review the finished pages. AI supports coding and testing; the case study explains that contribution.

CONTACT

North Lakes, QLD
